PPM Visit Report

DLS/PPM/RB/211026-1

October 21, 2026

Visit Details:

Client	Arkhe Club, Dubai, UAE
Visit Date	21 October 2026
Visit	First PPM visit (1 of 5)
Scope	All Panatta equipment
Performed by	Profit Sports Solutions technical team

Work Performed:

- All machines tested to confirm proper operation.
- All bolts checked and tightened.
- All cables inspected and confirmed in good condition.
- Greasing of all machines.
- Silicone spray applied to all machines.

Findings & Actions:

Equipment	Serial No.	Finding	Action Taken	Status
Three Angles Biceps Machine	25019917	Noise from a moving part during left and right movement	Part inspected and adjusted	Resolved – operating silently
Standing Abductor Machine	25019878	Noise under heavy weights	Machine disassembled and the affected part greased	Resolved – operating normally

Overall Condition:

All Panatta equipment was tested after the PPM and is operating properly.

Recommendation:

To maintain the effectiveness of the lubrication, we recommend that the gym's cleaning team be advised not to remove the grease applied to the moving parts of the equipment during routine cleaning. The grease has been applied in controlled quantities to minimize dust accumulation while ensuring smooth operation.

Next PPM Visit:

End of January 2027.
